

Overview

The Conservation Stewardship Program (CSP) helps agricultural producers maintain and improve their existing conservation systems and adopt additional conservation activities to address priority resources concerns. Participants earn CSP payments for conservation performance—the higher the performance, the higher the payment.

CSP

Conservation Stewardship Program

USDA's Natural Resources Conservation Service offers voluntary Farm Bill conservation programs that benefit both agricultural producers and the environment.

Benefits

Through CSP, participants take additional steps to improve the resource conditions on their land—including soil, air and habitat quality, water quality and quantity, and energy conservation.

CSP provides two types of payments through five-year contracts: annual payments for installing new conservation activities and maintaining existing practices; and supplemental payments for adopting a resource-conserving crop rotation. Producers may be able to renew a contract if they have successfully fulfilled the initial contract and agree to achieve additional conservation objectives. Payments are made soon as practical after October 1 of each fiscal year for contract activities installed and maintained in the previous year.

Eligibility

Eligible lands include private and Tribal agricultural lands, cropland, grassland, pastureland, rangeland and nonindustrial private forest land. CSP is available to all producers, regardless of operation size or type of crops produced, in all 50 states, the District of Columbia and the Caribbean and Pacific Island areas. Applicants may include individuals, legal entities, joint operations or Indian tribes that meet the stewardship threshold for at least two priority resource concerns when they apply. They must also agree to meet or exceed the stewardship threshold for at least one additional priority resource concern by the end of the contract.

Producers must have effective control of the land for the term of the proposed contract. Contracts include all eligible land in the agricultural operation.

Additional restrictions and program requirements may apply.

How to Apply

Visit your local USDA Service Center to apply or visit www.nrcs.usda.gov/getstarted.

What's New in CSP

The 2014 Farm Bill increased the program's focus on generating additional conservation benefits, removed the limitation on the number of nonindustrial private forestland acres that can be enrolled in CSP, and increased flexibility to enroll land coming out of the Conservation Reserve Program.

Payment Limit: A person or legal entity may not receive more than \$200,000 during fiscal years 2014 through 2018.

NRCS can help producers conserve water with efficient irrigation systems.
